

# Drawing with one line

A connecting workshop to grow as a group.

By Jana Mordhorst

## What and for who?

„Drawing with one line“ is a workshop format that is ideal for exploring the creative sides in people. Through fun and easy drawing exercises, connections within the group are strengthened, and individuals can discover their inner artist.

The program is suitable for various occasions such as company parties or team-building events, birthdays, schools, and other groups. All ages are welcome, and no prior knowledge is required.

## Takeaways

- Communicating and creating with a team
- Letting go of prejudices and expectations
- Discovering new aspects of yourself.
- Getting to know the people around you better
- Practicing presentation skills in a safe space
- Having fun!

## Duration & program

You can book a short session with a handful of exercises, or you can choose for the full experience of a half-day program. The exercises can be customized according to your preferences.

## Capacity

The workshops are designed for 6 to 14 people. However, if the group size needs to be adjusted we will find a way to accommodate your needs.

## Languages

The session can be guided in English, Dutch, or German.

## Materials

Sustainability is an important value for me. Therefore, I use recycled, environmentally friendly, and high-quality materials.

„Jana is a wonderful space holder, made everyone feel comfortable and allowed unexpected collective creativity to emerge.“

*Andrea Bolognin*

## Something about me

I am a freelance artist and designer, living and working in Amsterdam since 2019. The drawings I make are created in the moment by using a single line. My main source of inspiration are people and their connections.

Last year, I started sharing this passion through hosting One Line Drawing Sessions.

## Connecting your group with one line?

I look forward to hearing from you!
